

Aquanor Trawler Cod From Iceland

Aquanor Marketing, Inc. is proud to introduce **Aquanor Trawler Cod from Iceland**, a superior quality whitefish sustainably harvested in the clear, cold North Atlantic waters. With a lean, flaky texture and mild delicate flavor, this MSC certified fish is responsibly sourced from the world's purest fishing grounds.

Aquanor's expert groundfish producers select only the highest quality cod from their own fleet of boats. These boats use the latest technology to monitor each trawl limiting the number of fish, thus protecting the quality of our superior product. Each trawl is individually numbered and dated allowing the plant to use only the most recent catch when producing for Aquanor. Aquanor Trawler Cod is flown directly to Boston within 24 hours of landing to ensure the freshest quality product available.

- **Sustainably harvested**
- **MSC Certified**
- **Hand trimmed and candled**
- **Available fresh year-round**
